

WEC-type: E-175 HT 162m

Quantity of turbines: 1 Turbine

Works		[EUR]
Disassembly of WEC + Steelsections	Grid disconnection Dismounting WEC Dismounting Steelcomponents Recycling	37.400 €
Deconstruction Concrete Tower	Deconstruction incl. Breaking, Recycling & transport	106.400 €
Deconstruction of Foundation	Removing foundation cover Deconstruction foundation Recycling + transport	47.600 €
Transport	Transport WEC 200km Transport Steelcomponents 200km	30.600 €
<u>Total net per Windenergyconverter:</u>		<u>222.000 €</u>

Validity period: 01. Januar 2026 to 31. December 2026

It is not necessary to differentiate between the E1 and E2 systems when determining the dismantling costs
as the deviations in the quantities are insignificant.

This cost estimation refers to a dismantling after economic lifetime.

This cost estimate is only for information . All information are provided without warranty.
The cost estimate is not an offer and is not an assurance that ENERCON carries out the dismantling work for the above sum .
